

TECH TALK

"Safety Standards are changing - but how do deal with this in a practical manner?"

Rochestown Park Hotel, Cork
Wednesday, 28th January 2015, 19.00hr

In this talk Pilz will discuss current Safety Technologies, looking at options for safety function input devices such as temperature transmitters, pressure transmitters to safety controllers and High integrity PLCs. We will also provide a demonstration of the award winning "Pilz Safety EYE 3D" safe camera system.

This will be a practical talk on solutions to safety systems and is aimed at all delegate levels from engineering to product selection through to installation and maintenance.

Guest Speaker: Wesley O' Shea - Pilz Ireland Automation Engineering Manager

About Wesley O'Shea and Pilz Ireland Automation

Pilz Ireland specializes in providing project management and essential, professional safety consulting and engineering services to the manufacturing, process and other industry sectors locally in Ireland. Pilz offer a portfolio of services enabling companies comply with statutory regulations and achieve planned safety goals.

Clients of Pilz Ireland include global manufacturers within the typical industrial sectors served by the group and in particular the Pharmaceutical, Medical Device and Food & Beverage sectors.

The business areas within the services group are

- Process Safety Services
- Machinery Safety Services
- Standard Automation & Control
- Project Management
- Safety Training

Wesley graduated from University College Cork with an honours degree in Electrical/Electronic Engineering almost 15 years ago. He started his professional career

With Irish Ispat (formerly Irish Steel) as an Automation and Control Engineer. As part of the Electrical Engineering department at Ispat, Wesley got hands on engineering exposure across a range of electrical disciplines from 110kV plant supplies to Furnace Control and Burner Management systems. Following a brief period working for FCI Electronics in Fermoy, Wesley joined Pilz in 2002 as an Application Engineer and since then has been a key player in building the team for Pilz in Ireland to what is now almost 150 strong in the Cork office. As Automation and Engineering Manager for Pilz in Ireland, he is now responsible for the delivery of engineering services across a range of industries for Pilz both nationally and international. He continues to develop his technical strengths in both process safety control systems and standard automation platforms. Pilz provide a range of Engineering and Consultancy services across several industries - As a system supplier for safe and standard automation we have acquired extensive specialist knowledge over more than 65 years. We are your competent partner during all phases of your project, from consultancy through engineering design, programming, installation and commissioning.
