

"Technology Modernization of Plant Automation Systems"

Venue

Crowne Plaza Hotel, Blanchardstown, Dublin 15
Wednesday, 25th March 2015

A showcase of new developments within automation technology solutions in the manufacturing and service industries. This event is themed towards approaches that are needed to allow plant systems to be upgraded, for example, to a new OS platform/hardware or utilizing a virtual environment.

First-hand experiences from guest speakers

Novartis, Johnson & Johnson, Rockwell, Amgen, Helsinn and more...

Driving efficiency and innovation through technology modernization within the process control layer can be a major challenge. But harnessing advances in technology is as important as ever. Utilizing technologies such as virtualization reduces physical hardware costs but requires significant planning and investment.

This seminar will bring together key industry guest speakers who have successfully implemented such programs for "Technology Modernization" along with industry solutions from vendors based on past case studies and examples.

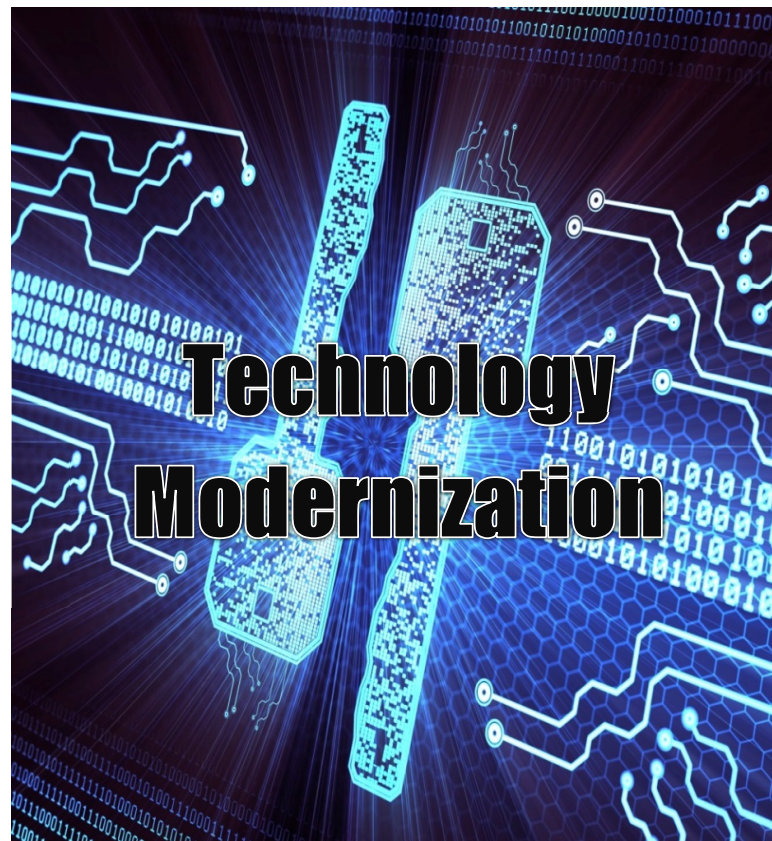

Who should attend this event?

- Automation / IT and Energy Professionals
- Project Managers and System Application Experts
- System Integrators

About the ISA

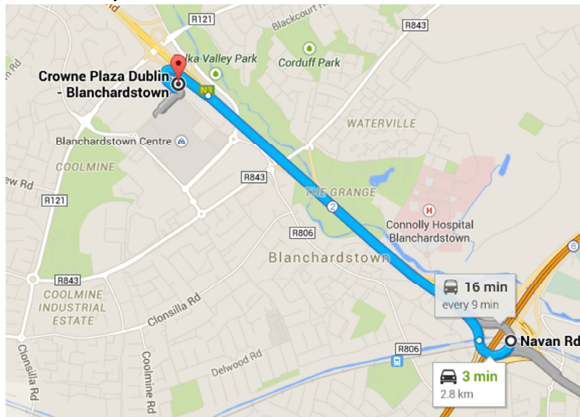

The International Society of Automation is a non-profit organization that helps its 30,000 worldwide members and other automation professionals solve difficult technical problems, while enhancing their leadership and personal career capabilities.

The Ireland Section, which is voluntary with a membership of over 330, received its charter in 1978 and has since grown to become a nationally recognised organisation. Its purpose is to bring together all personnel

involved Automation in order to enhance their capabilities in design, manufacture and use.

Getting to the Crowne Plaza Hotel

Take Exit 6 on M50 (Northbound), Dublin. Take Navan Road (Westbound) and continue until you reach your destination.

ISA Ireland, would like to thank our Corporate Sponsors for their continued support
